Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 178, Nos. 1 & 2, January 1998

W.J. Roesler and E.A. Park: Hormone response units: One plus one equals more than two 1–8

K.S. Saini and N.I. Walker: Biochemical and molecular mechanisms regulating apoptosis 9–25

R. de Souza Pereira, F. Pavão and G. Oliva: The use of molecular modelling in the understanding of configurational specificity (R or S) in asymmetric reactions catalyzed by *Saccharomyces cerevisae* or isolated dehydrogenases 27–31

R. de Souza Pereira: Comparison of biochemical effects produced by calcium ions and by monomers of polyacrylamide (acrylamide and bisacrylamide) on strains of *Saccharomyces cerevisae* used for production of chiral synthons 33–40

S. Musavi and P. Kakkar: Diazepam induced early oxidative changes at the subcellular level in rat brain 41–46

R.V. Deshpande and M.A.S. Moore: G-CSF receptor-mediated up-regulation of c-fos but not c-raf mRNA expression in myeloid cells 47–50

H. Sano, H. Okamoto, A. Kibatake, K. Iizuka, T. Murakami and H. Kawaguchi: Increased mRNA expression of cardiac renin-angotensin system and collagen synthesis in spontaneously hypertensive rats 51–58

L.R. Chaudhary and L.V. Avioli: Identification and activation of mitogen-activated protein (MAP) kinase in normal human osteoblastic and bone marrow stromal cells: Attenuation of MAP kinase activation by cAMP, parathyroid hormone and forskolin 59–68

J. Karlsson and Ragnhild Rønneberg: Muscle metabolism and quality (MQI) in prediabetic sedentary man 69–75

V. Sandhu, M. Miller and A.K. Grover: Effects of peroxide on the fluorescence of the CA^{2+} probe Fluo 3 and the pH probe BCECF 77–80

T.C. Vary, C. Jurasinski, S.R. Kimball: Reduced 40S initiation complex formation in skeletal muscle during sepsis 81–86

R.T. Dowell and M.C. Fu: Heterogeneous cellular expression of creatine kinase isoenzyme during normal rat heart development 87–94

L. Pedro, R. Fenrick, M. Marquis, N. McNicoll and A. De Léan: Characterization of the phosphorylation state of natriuretic peptide receptor-C 95–101

C-K. Moitreyee, A. Suraksha and A.S. Swarup: Potential role of Nf-kB and RXR beta like proteins in interferon induced HLA class I and beta globin gene transcription in K562 erythroleukaemia cells 103–112

J. Górski, A. Nawrocki and M. Murthy: Characterization of free and glyceride-esterified long chain fatty acids in different skeletal muscle types of the rat 113–118

J. Zarić, V. Glišin and Z. Popović: Evidence for HSP70-like protein in the RBC membrane of the hereditarily anemic Belgrade laboratory (b/b) rat 119–125

K. Husain, C. Morris, C. Whitworth, G.L. Trammell, L.P. Rybak and S.M. Somani: Protection by ebselen against cisplatin-induced nephrotoxicity: Antioxidant system 127–133

M. Zhang, M. Paskvalin and J.C. Khatter: Pharmacological characterization of an Endogenous Negative Inotrophic Factor (ENIF) from porcine heart 135–139

S.J. Chen, M.E. Bradley and T.C. Lee: Chemical hypoxia triggers apoptosis of cultured neonatal rat cardiac myocytes: Modulation by calcium-regulated proteases and protein kinases 141–149

C. Vergely, M.K. Walker, M. Zeller, J-R. Rademakers, V. Maupoil, P. Schiavi, D. Guez and L. Rochette: Antioxidant properties of indapamide, 5-OH indapamide and hydrochlorothiazide evaluated by oxygen-radical absorbing capacity and electron paramagnetic resonance 151–155

J.W. Celler, X. Luo and F.D. Böhmer: Protein tyrosine phosphatase gene expression analysis in Swiss 3T3 fibroblasts 157–162

S. Galland, F. Le Borgne, D. Guyonnet, P. Clouet and J. Demarquoy: Purification and characterization of the rat liver gamma-butyrobetaine hydroxylase 163–168

T. Kaur, S. Singh, V. Dhawan and N.K. Ganguly: *Shigella dysenteriae type 1* toxin induced lipid peroxidation in enterocytes isolated from rabbit ileum 169–179

A. Terrasa, M. Guajardo and A. Catalá: Lipoperoxidation of rod outer segments of bovine retina is inhibited by soluble binding proteins for fatty acids 181–186

B. Gao, H. Jaffe and G. Kunos: Histone H1 isoforms purified from rat liver bind nonspecifically to the nuclear factor 1 recognition sequence and serve as generalized transcriptional repressors 187–196

C.K. Pushpendran, M. Subramanian, T.P.A. Devasagayam and B.B. Singh: Study on lipid peroxidation potential in different tissues induced by ascorbate-Fe^{2+}: Possible factors involved in their differential susceptibility 197–202

P.E. Vivas-Mejía, O. Cox and F.A. González: Inhibition of human topoisomerase II by anti-neoplastic benzazolo [3,2-*a*] quinolinium chlorides 203–212
M.P. Mollica, S. Iossa, G. Liverini and S. Soboll: Steady state changes in mitochondrial electrical potential and proton gradient in perfused liver from rats fed a high fat diet 213–217
V. Leskovac, S. Trivić and B.M. Anderson: Use of competitive dead-end inhibitors to determine the chemical mechanism of action of yeast alcohol dehydrogenase 219–227
S.W.S. Jans, Y.F. de Jong, C.P.M. Reutelingsperger, G.J. van der Vusse and M. van Bilsen: Differential expression and localization of annexin V in cardiac myocytes during growth and hypertrophy 229–236
M. Shah Alam, K. Ku, M. Yamauchi, M. Hashimoto, S. Nosaka, M. Shahdat Hossain, S. Masumura, K. Nakayama and K. Tamura: Protective effects of nicaraven, a new hydroxyl radical scavenger, on the endothelial dysfunction after exposure of pig coronary artery to hydroxyl radicals 237–243
I.I. Budihardjo, G.G. Poirier, and S.H. Kaufmann: Apparent cleavage of poly(ADP-ribose), polymerase in non-apoptotic mouse LTA cells: An artifact of cross-reactive secondary antibody 245–249
A. Krishnan, R.M. Goraczniak, T. Duda and R.K. Sharma: Third calcium-modulated rod outer segment membrane guanylate cyclase transduction mechanism 251–259
R. Rajkumar, H. Devaraj and S. Niranjali: Binding of *Shigella* to rat and human intestinal mucin 261–268
K. Lee, G.J. Hausman and R.G. Dean: Expression of C/EBPα, β and γ in fetal and postnatal subcutaneous adipose tissue 269–274
N. Shinya and M. Yamaguchi: Stimulatory effect of calcium administration on regucalcin mRNA expression is attenuated in the kidney cortex of rats ingested with saline 275–281
M. Yamaguchi and S. Ueoka: Expression of calcium-binding protein regucalcin mRNA in fetal rat liver is stimulated by calcium administration 283–287
K.E. Achyuthan: Characterization of the reciprocal binding sites on human α-thrombin and factor XIII A-chain 289–297
L. Tang, R.J. Reiter, Z-R. Li, G.G. Ortiz, B.P. Yu and J.J. Garcia: Melatonin reduces the increase in 8-hydroxy-deoxyguanosine levels in the brain and liver of kainic acid-treated rats 299–303
T. Murata and M. Yamaguchi: Tissue-specific binding of nuclear factors to the 5′-flanking region of the rat gene for calcium-binding protein regucalcin 305–310
H. Takahashi, T. Murata, Y. Hanahisa and M. Yamaguchi: Streptozotocin-induced diabetes increases (Ca^{2+}-Mg^{2+})-ATPase activity in hepatic plasma membranes of rats: Involvement of protein kinase C 311–316
P. Sehl, J.Y.K. Tom, D. Oare and D.G. Lowe: Receptor-specific ligands distinguish natriuretic peptide receptors-A and -C in primate tissues 317–324
G. Arias, G. Asins, F.G. Hegardt and D. Serra: The effect of dexamethasone treatment on the expression of the regulatory genes of ketogenesis in intestine and liver of suckling rats 325–333
T. Mori, T. Takeuchi, M. Ohura, G. Miyakoda, H. Fujiki, K. Orito, K. Yoshida, T. Hirano, Y. Yamamura, T. Sumida, Y. Nakaya, H. Satake and F. Hata: Pranidipine, a new 1,4-dihydropyridine calcium channel blocker, enhances cyclic GMP-independent nitric oxide-induced relaxation of the rat aorta 335–343
A. Mehta, S. Singh, V. Dhawan and N.K. Ganguly: Intestinal mucosal lipid peroxidation and absorptive function in *Salmonella typhimurium* mediated intestinal infection 345–352
D. Rousseau, D. Moreau, D. Readerstorff, J.P. Sergiel, H. Rupp, R. Muggli and A. Grynberg: Is a dietary n-3 fatty acid supplement able to influence the cardiac effect of the psychological stress 313–366
Y-j. Hei, S. Farahbakhshian, X. Chen, M.L. Battell and J.H. McNeill: Stimulation of MAP kinase and S6 kinase by vanadium and selenium in rat adipocytes 367–375
M. Yamaguchi and Y.H. Gao: Anabolic effect of genistein and genistin on bone metabolism in the femoral-metaphyseal tissues of elderly rats: The genistein effect is enhanced by zinc 377–382

Short communications

D. Kaul, M. Kaur and V. Dhawan: Human platelets contain a novel 47 kDa thiol-oxidase having affinity for genomic sterol-regulatory sequence 383–385
T. Iantomasi, F. Favilli, P. Marraccini and M.T. Vincenzini: Glutathione involvement on the intestinal Na^{+}-dependent D-glucose active transporter 387–392
E. Cardellini, G. Piccinini and G.L. Gianfranceschi: Phosphopeptides derived from *in vitro* phosphorylated *E. Coli* RNA polymerase bind to DNA and affect DNA transcription 393–396
